

# Screen Options

WINDOWS AND PATIO DOORS

## Features & Benefits

Screens allow you to enjoy the fresh air while keeping insects and debris out of your home. Timeline offers three screen options: Fiberglass, BetterVue and Aluminum.

Fiberglass is our standard screen. It's the most popular screen material due to its long-lasting and minimal maintenance qualities. It's constructed of fiberglass strands coated with charcoal plastic resin woven into mesh. Fiberglass screens are fire-retardant and will not rot, corrode, shrink, scratch or stain.

BetterVue is our newest offering. It's also made of fiberglass, but has thinner strands and a tighter weave than our standard fiberglass screen. It provides better visibility, increased light transmittance, greater airflow, improved curb appeal and enhanced protection from small insects (no-see-ums), debris and dust.

Aluminum is the most widely used metal for screens and is a great option for homes with pets or kids. It's constructed of aluminum wire woven into mesh.

Standard Fiberglass

BetterVue

## When only the best will do.

Choose Timeline for your new construction, remodeling or even light commercial projects. With over 60 years of manufacturing experience built into every unit, we engineer our windows and patio doors for visual appeal as well as outstanding performance and back it up with exceptional customer service before and after the sale.

We are continually expanding our list of product offerings, options, and accessories and are confident that we have the perfect window or patio door to harmonize with your ideas and designs.

Timeline Windows & Doors carry an extensive product warranty. Ask your dealer for complete information.
